to forward the statistics in the same way as they are furnished by Chicago and Milwaukee:

To the Editor of The N.Y. Tribune.

Sin: The suncurt of grain (flour, wheat, and corning they) received and shipped from this port East, by lake, this year, far exceeds the amount received and shipped as any other lake port except Chicago, yet we are centinually piqued on seeing the receipts and shipments from Edit sukes. Detroit and Cheveland, conspicuously presented, while our much larger grain business is mirely noticed.

The commercial column of The Toledo Blade furnishes daily and we sky reports of grain receipts. Many weeks this reason the receipts of flour and wheat alone at Toledo have been greater than the combined receipts of Milwaukee, Detroit, and Civedand.

For ten years we have been second only to Chicago in receipts of earn. We would be pleased to have you observe the receipts of earn. We would be pleased to have you observe the receipts of the grain the past and the coming year. We sak no pulse flut only that our grain trade, as compared with other Western cities, be noticed in proportion to its magnitude.

labors by property owners interested in the Central

Company, on the ground that they had no right of way. Meanwhile the Common Council has taken up

the matter and the Committee on the subject met last night. Both par ies interested express their readiness

to come to some amicable arrangement, the details of

which cannot however, be so excily decided upon. The Committee, after hearing parties on both sides

adjourned to meet again before presenting their report.

It would certainly be to the interest of the community

if an amicable arrangement could be speedily of

110 Mich S. & N. I. R.R. 151 as follows: FRIDAY, Oct. 26-P. M. The excitement in the Stock market continues, and at the First Board to-day, was intensified to an extraordinary degree, and there was more of a panic look about the market than we have seen since the Auto on of 1857. Prices were worked down upon nearly every stock upon the list, and the disposition during the early part of the day seemed to be to sell at the first bid made. It looked in fact as if the brokers had made up their minds that the Union was already about the same as in fragments, and that celf preservation required that each one of them should "stand from under" as the structure gave way. At the close of each call there was a elight recovery from the lowest points touched, and the morning esseion closed with a steady feeling. At the Second Board there was a feverish irregularity, but upon the whole rather lower prices, but after the session the market hardened again and finally closed firmer and better. The day's operations have been large, and there seems to have been little or no discrimination as to stocks of the speculative class—the slaughtering process extending apparently to the whole list. In spite of all the direful prognestications of dissolution, however, and the full programme of horrors paraded in the papers of this morning, the market seemed to touch bot om. The mass of cont-acts that were frightened into liquidarion during the last few days resulted apparently in their last effects to-day, and there probably are fewer contracts of the bulls outstanding than for the last two years. At the same time there is a large mass of sellere ortion stock to be bought in and delivered to strong partice who generally are able to retire them from the market. The most noticeable feature at the Board today was the large number of orders for cash from real monied men willing and anxious to take the prominent tocks at the present low prices. One or two of the shrewd bear operators observed these facts, and took prompt measures to secure themselves against the inexitatile recoil, leaving to the larger number, who go it blind or follow in the train, to take care of themselves. The sales of State Stocks were larger than usual and there were evidently selected as good targets for political artiflery. THE CAPITAL PUNISHMENT LAW, -District-Attor-

THE CAPITAL PUNISHMENT LAW,—District-Attorney Wateriury denies all share in the passage of the new capital punishment law. "I clearly pointed on; bessys " that the death penalty could not be inflicted under the provisions of the bill, although its professed object was to render it in some cases more certain. I had no doubt then that it was, as the result has proved it to be, a movement to abolish the capital punishment by indirection. I did not, however, go into a critical analysis of the language of the bill, and, therefore, did not observe that it left the law in such a shape that no punishment could be inflicted for murder in the first degree."
